### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 has been amended to recite a Markush Group of metal oxides, salts thereof and reactive glasses as the "basic component" and to define its function in the claimed composition as cation releasing in the presence of an acidic component wherein the cations mediate crosslinking and solidification of the acidic component. This limitation is considered to distinguish the instantly claimed compositions from the prior art compositions known to the examiner. Napadensky, of record, teaches analogous compositions wherein titanium dioxide, which is not included in the instant Markush Group, is disclosed as a white pigment and no other metal oxides or reactive glasses are mentioned. DE '233, of record, discloses analogous compositions wherein the basic component is a nitrogen-containing organic base that functions as a Lewis Base in acid-base reactions, as argued by applicant.

The following references are cited as art of interest. Liu et al (6,780,368) disclose a layer manufacturing method that employs a binder powder and UV light. Bredt et al (6,416,850 or US 2005/0003189) discloses a three dimensional printing materials system that delivers an aqueous solvent to an adhesive particulate mixture, causing the particles in the mixture to adhere together. Felten (4,598,037) discloses a photosensitive conductive metal composition comprising particulate reactive aluminosilicate glass, a photoinitiator and photopolymerizable monomer. Felten does not teach that the glass is cation releasing in the presence of an acidic component which is then crosslinked and solidified by the cationic initiation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to /Susan W. Berman/ whose telephone number is 571 272 1067. The examiner can normally be reached on M-F 9:30-6:00.
